

Medicare Physician Voluntary Reporting Program Work Sheet

Check only one choice per measure. (Primary Care)

Date of Service _____ Physician _____ Patient _____

For patients with a diagnosis of Type 1 or Type 2 diabetes mellitus:

Measure: Hemoglobin A1c (Poor Control)

___ Patient has received care for at least 12 months and has the most recent HbA1c level documented as $> 9\%$ **G8015**

___ Patient has received care for at least 12 months and has the most recent HbA1c level documented as $\leq 9\%$ **G8016**

___ Physician documented patient is NOT an eligible candidate for the HbA1c measure **G8017**

___ Patient has NOT received care from my practice for at least 12 months **G8018**

Measure: Low Density Lipoprotein Control

___ Patient has received care for at least 12 months and most recent LDL documented as < 100 mg/dl **G8020**

___ Patient has received care for at least 12 months and most recent LDL documented as ≥ 100 mg/dl **G8019**

___ Physician documented patient is NOT an eligible candidate for LDL measurement **G8021**

___ Patient has NOT received care from my practice for at least 12 months **G8022**

Measure: High Blood Pressure Control

___ Patient has received care for at least 12 months and most recent blood pressure is documented < 140 systolic and < 80 diastolic **G8024**

___ Patient has received care for at least 12 months and most recent blood pressure is documented as ≥ 140 systolic or ≥ 80 diastolic **G8023**

___ Physician documented patient is NOT an eligible candidate for blood pressure control measure **G8025**

___ Patient has NOT received care from my practice for at least 12 months **G8026**

For Patients Diagnosed With Heart Failure & Left Ventricular Systolic Dysfunction:

Measure: ACE-I or ARB for LVSD

- ☐ Patient with heart failure and LVSD documented to be on either ACE-I or ARB **G8027**
- ☐ Patient with heart failure and LVSD NOT documented to be on either ACE-I or ARB **G8028**
- ☐ Physician documented patient is NOT an eligible candidate for ACE-I or ARB **G8029**

For Patients with Coronary Artery Disease & Prior Myocardial Infarction at Any Time:

Measure: Beta-blocker for Patient with Coronary Artery Disease & Prior Myocardial Infarction

- ☐ Patient with prior MI and CAD documented to be on beta-blocker **G8033**
- ☐ Patient with prior MI and CAD documented to NOT be on beta-blocker **G8034**
- ☐ Physician documented patient is NOT an eligible candidate for beta-blocker **G8035**

For Patients Aged 75 or Over:

Measure: Assessment for Falls

- ☐ Patient documented for the assessment of falls within the last 12 months **G8055**
- ☐ Patient NOT documented for the assessment of falls within the last 12 months **G8054**
- ☐ Patient documented patient is NOT an eligible candidate for falls assessment **G8056**

For Patients Aged 18 or Over, Diagnosed With New Episode of Major Depression and Treated with Antidepressant Medication:

Measure: Antidepressant Medication during Acute Treatment Phase

- ☐ Patient documented as treated with antidepressant medication for entire 12 weeks **G8126**
- ☐ Patient NOT documented as treated with antidepressant medication for entire 12 weeks **G8127**
- ☐ Physician documented patient is NOT an eligible candidate for antidepressant medication for entire 12 weeks **G8128**
